

Time,
and up-time,
is **money.**

MacDon makes a heckuva header-

several, in fact. But there are times, particularly in heavy crops, where it would be nice to be able to go faster, and save time and fuel, without risking plugging up and causing costly downtime.

If you really like your MacDon, but wish you could do something to improve the effectiveness of the product feed through the adapter auger, then the Combine World **Draper Drum** is for you.

For FD70, FD75, D50, D60, D65, FD135,
FD140, FD145
(CA20, CA25 & FM100 adapters)

Introducing the
Draper Drum

Do you run a
MacDon header?
Improve your
product feeding.

Made in Canada, by

Go faster • Handle heavy crops better • Spend less time dealing with blockages.

Go from a 16"
tube
to a **12"**

Lots more room for your crop
to go through without slowing
down or plugging.

MacDon Factory auger drum

The new, improved Draper Drum

Add
more fingers,
and a much
more aggressive
flighting design

Our heavy duty drum gives your
crop an extra push, and then some.

Enjoy the
benefits this
season, and into
the future

*"(When we) couldn't fix the issue,
Combine World was willing
to figure out a resolution. Thank you
so much for covering the repair."
C. CHYZ - REGINA, SK, CANADA*

Combine World stands behind its products.
Our Draper Drum (and all our manufactured
products) are backed by our one-year warranty.
We've stayed in business for 35 years by seeing
things from our customers' point of view, and
doing the right things right.
