

Introducing the *Draper* **Drum**

MacDon Owners:
**Your Ultimate
Solution to
Better Feeding**

Time, and up-time, is money.

MacDon makes a heckuva header -

several, in fact. But there are times, particularly in heavy crops, where it would be nice to be able to go faster, and save time and fuel, without risking plugging up and causing costly downtime.

If you really like your MacDon, but wish you could do something to improve the effectiveness of the product feed through the adapter auger, then the Combine World **Draper Drum** is for you.

For FD70, FD75, D50, D60, D65, FD135, FD140, FD145 (CA20, CA25 & FM100 adapters)

Go faster • Handle heavy crops better
Spend less time dealing with blockages.

Made in Canada, by

Go from a 16"
tube
to a **12"**

Lots more room for your crop
to go through without slowing
down or plugging.

MacDon Factory auger drum

The new, improved Draper Drum

Add
more fingers,
and a much
more aggressive
flighting design

Our heavy duty drum gives
your crop an extra push, and
then some.

Enjoy the
benefits this
season, and
into the future

*"(When we) couldn't fix the
issue, Combine World was
willing to figure out a
resolution. Thank you so
much for covering
the repair."*

C. CHYZ - REGINA, SK,
CANADA

Combine World stands behind its products. Our Draper
Drum (and all our manufactured products) are backed by our
one-year warranty. We've stayed in business for 35 years by
seeing things from our customers' point of view, and doing
the right things right.

Check out Combine World Manufacturing's other
products for MacDon and other farm equipment:
